## Guide to Installing your Custom HoloKote for Magicard Ultima printer

Installing a Custom HoloKote to your Ultima printer can be done in two ways, both through your printer driver.

**If the printer is connected to an Internet-enabled PC:** By downloading the HoloKote securely from our webserver.

**If the printer cannot be connected to an Internet-enabled PC:** By downloading the HoloKote file from your support account and installing it offline from a connected PC.

## **Online Installation**

Open the Magicard Ultima driver in the **<Devices and printers>** area of your Windows OS and then open **<Printing Preferences>**

Order	HoloKote	Manage HoloKote
Rotation	No rotation 🔹	HoloKote'

Once complete, this interface will show your currently <**Installed**> HoloKotes and <**Available**> custom designs from your support account.

To install the HoloKote to your printer select your design in the **<Available>** panel. Highlight one memory slot from the 10 preinstalled designs. When ready click the transfer arrow between the two panels, this will overwrite the selected preinstalled design with your Custom HoloKote.

## Offline installation

If your printer cannot be connected to an Internet-enabled computer it is possible to perform an offline installation.

To do this you will need to download your Custom HoloKote file from your online support account and transfer it to a computer connected to your Ultima printer via USB or Ethernet.
